

The Skycore Aviation Professional

Skycore Aviation maintains an in-depth personnel database and has the network and knowledge to find highly qualified individuals from multiple venues. Our ISO 9001:2015 and AS9100D certified infrastructure and processes enable us to source large amounts of personnel information to find and place experts in positions requiring unique qualifications.

We perform a comprehensive vetting process on all candidates to verify each is experienced in the latest equipment and technologies and will represent Skycore's work, ethical, moral and legal values.

We ensure that each candidate has:

- The experience, qualifications and certifications stipulated by the client and statement of work
- Verified military experience documented through individuals DD214 or foreign military equivalent
- Verified civil experience documented through individuals logbooks or foreign equivalent
- Documented experience by civil and/or military training certifications
- FAA and/or EASA licenses as required
- Personal and professional references supporting resume work experience and qualifications
- Completed an in-person interview with Skycore management

Our candidates are vetted by a:

- 5-year employment verification
- Drug and alcohol testing
- E-verification to work in the U.S.
- 7-year criminal database search
- Financial database search
- Social Security search
- OFAC (Treasury, Office of Foreign Assets Control)
- U.S. Patriot Act watch list search

All Skycore employees review, acknowledge and comply with our internal policies that support our high ethical and quality standards:

- Confidentiality agreement
- Drug and alcohol policy
- Record retention policy
- Human Rights Policy
- Safety Policy
- Electronic and media policy
- Export compliance training
- Medical testing
